# Monero addresses in this folder

Ten payout addresses from the eXch swaps. Reconstructed 26 September 2026.

The only Monero addresses in this folder are the ten eXch.cx named as the destination of the ETH-to-XMR swaps. They are printed in the injunction, ORC 330, at pages 12 and 13, wrapped down a narrow column. The same ten are on a screenshot at page 106 of Jacob Gadikian's affidavit and page 45 of Mika Dahiya's affidavit, where the address column and the hash column run together. Eight of the ten are also in Annex B of the 1 April 2024 letter to eXch, at pages 115 and 116 of the Gadikian affidavit. That annex totals 713.0890314 XMR. The order lists all ten and totals 880.1351259 XMR. The difference is rows 4 and 5.

Each address below was rebuilt by reading that column in order, top to bottom, and ignoring the transaction-hash column to its right. Every result is 95 characters. Each one decodes under Monero's block base58 and the 4-byte Keccak checksum matches, as a mainnet subaddress. The summons repeats the order, so it does not add an eleventh address. Nothing else in the folder — the Binance workbooks, the statement of claim, or the staff letter — contains a Monero address.

Annex B's text layer disagrees with the order on one character of address 3: the letter extraction has Vx where the order has vX. The order's spelling is the one whose checksum matches, and it is the spelling used here. The hashes are the 64-character hex strings printed in the column next to each address. They are copied, not checksummed. Monero transaction hashes are not validated the way addresses are.

## The ten addresses

| # | XMR | In the 713 XMR set | eXch deposit the ETH came from |
|---|---|---|---|
| 1 | 1.40338833 | Yes | `0x9db5ec9c9cd5069558aed75d6c62074575e1c082` |
| 2 | 168.9846284 | Yes | `0x91450caa3e6cca9628ba9d9d791fd6d221b4a37b` |
| 3 | 2.42763379 | Yes | `0x98fc891b958f17f4c3b2aa48a027df0d1844c3a9` |
| 4 | 163.3835805 | No. Order only. | `0x16c3ae5f1db416fb9bb13ca465099d24e71c287e` |
| 5 | 3.662514 | No. Order only. | `0xaa3b106d7970df16ef5b95de88d4be9a6201007f` |
| 6 | 320.884046 | Yes | `0x831ee72e7e5645d5fbacbfe50a13bff5fa6e0859` |
| 7 | 27.3554845 | Yes | `0x7de7db1ca298fd177cbf0ceb919f1dbfe7bf3f59` |

Rows 1, 2, 3, 6, 7, 8, 9 and 10 are the Annex B set: 1.40338833 + 168.9846284 + 2.42763379 + 320.884046 + 27.3554845 + 3.94581865 + 90.61975468 + 97.46827712 = 713.08903147 XMR, against 47.74906175 ETH. Rows 4 and 5 add 163.3835805 and 3.662514 XMR. All ten sum to 880.13512597 XMR, which is the total printed on the order. eXch told Chainalysis it does not keep IP addresses or account metadata. The order nonetheless requires disclosure against these withdrawals. These strings identify the payouts. They do not identify a person.
